Heading level 2

paragraphs

I really like using Markdown.

I think I'll use it to format all of my documents from now on.

line breaks

To create a line break (
), end a line with two or more spaces, and then type return.

This is the first line.

And this is the second line.

First line with the HTML tag after.

And the next line.

emphasis

bold

I just love **bold text**.

I just love **bold text**.

Love**is**bold

italic

Italicized text is the *cat's meow*.

Italicized text is the *cat's meow*.

A cat meow

bold and italic

This text is ***really important***.

This is really ***very*** important text.

blockquotes

Dorothy followed her through many of the beautiful rooms in her castle.

blockquotes with multiples paragraphs

Dorothy followed her through many of the beautiful rooms in her castle.

The Witch bade her clean the pots and kettles and sweep the floor and keep the fire fed with wood.

nested blockquotes

Dorothy followed her through many of the beautiful rooms in her castle.

The Witch bade her clean the pots and kettles and sweep the floor and keep the fire fed with wood.

blockquotes with other elements

The quarterly results look great!

- Revenue was off the chart.
- Profits were higher than ever.

Everything is going according to **plan**.

lists

ordered lists

1. First item
2. Second item
3. Third item
4. Fourth item

1. First item

adding elements in lists

paragraphs

- This is the first list item.
- Here's the second list item.

I need to add another paragraph below the second list item.

- And here's the third list item.

blockquotes

- This is the first list item.
- Here's the second list item.

A blockquote would look great below the second list item.
- And here's the third list item.

code blocks

1. Open the file.
2. Find the following code block on line 21:

```
<html>
  <head>
    <title>Test</title>
  </head>
```

3. Update the title to match the name of your website.

images

1. Open the file containing the Linux mascot.
2. Marvel at its beauty.

3. Close the file.

lists

1. First item
2. Second item
3. Third item
 - Indented item
 - Indented item
4. Fourth item

code

At the command prompt, type `nano`.

escaping backticks

Use ``code`` in your Markdown file.

code blocks

```
<html>
  <head>
  </head>
</html>
```

horizontal rules

links

My favorite search engine is [Duck Duck Go](#).

adding titles

formatting links

I love supporting the [EFF](#).

This is the [Markdown Guide](#).

See the section on [code](#).

reference-style links

formatting the first part of the link

[hobbit-hole](#)

[hobbit-hole] 1

Formatting the Second Part of the Link

An Example Putting the Parts Together

In a hole in the ground there lived a hobbit. Not a nasty, dirty, wet hole, filled with the ends of worms and an oozy smell, nor yet a dry, bare, sandy hole with nothing in it to sit down on or to eat: it was a [hobbit-hole](#), and that means comfort.

In a hole in the ground there lived a hobbit. Not a nasty, dirty, wet hole, filled with the ends of worms and an oozy smell, nor yet a dry, bare, sandy hole with nothing in it to sit down on or to eat: it was a [hobbit-hole](#), and that means comfort.

linking images

escaping characters

* Without the backslash, this would be a bullet in an unordered list.

characters you can escape

\`*_{ }[]()#+-_.!|

HTML

This **word** is bold. This *word* is italic.

tables

Syntax	Description
Header	Title
Paragraph	Text

Syntax	Description
Header	Title
Paragraph	Text

alignment

Syntax	Description	Test Text
Header	Title	Here's this
Paragraph	Text	And more

Escaping Pipe Characters in Tables

You can display a pipe (|) character in a table by using its HTML character code (|).

Fenced Code Blocks

```
{  
  "firstName": "John",  
  "lastName": "Smith",  
  "age": 25  
}
```

syntax highlighting

```
{  
  "firstName": "John",  
  "lastName": "Smith",  
  "age": 25  
}
```

footnotes

Here's a simple footnote.^[^1] and here's a longer one.^[^bignote]

[^1]: This is the first footnote.

[^bignote]: Here's one with multiple paragraphs and code.

Indent paragraphs to include them in the footnote.

```
`{ my code }`
```

Add as many paragraphs as you like.

heading IDs

My Great Heading <#custom-id>
